Mission: To prepare the next generation of clinicians and scholars who collectively enhance individual and community health in a culturally diverse society.

Four Key Strategic Priorities

1. Facilitate student graduation success and expand program offerings
   - Increase interdisciplinary teaching/learning across the divisions.
   - Identify, recruit, and retain master teachers.
   - Implement focused advising to ensure student success.
   - Increase utilization of technology in recruitment and retention activities.
   - Explore and launch new health profession programs.

2. Expand research capacity and productivity
   - Develop an incentive plan to expand the college’s research portfolio.
   - Increase the number of named chairs and endowed professorships.
   - Create a structured mentoring program for new faculty.
   - Create interdisciplinary research teams who can compete for funding.
   - Launch an additional Ph.D. program.
**3 Strengthen collaborative entrepreneurial relationships locally and globally**

- Develop entrepreneurial and collaborative relationships locally and internationally.
- Strengthen relationships with local health partners from community-based partners to tertiary care centers.

**4 Ensure a robust and responsive administrative support structure**

- Centralize administrative support structure as appropriate to increase efficiency and effectiveness.
- Recruit, retain, and advance high performing personnel.
- Provide leadership training opportunities.
